

The Long Range Planning Committee has not met formally for some time due to the need to focus on technology needed for virtual Assemblies and group meetings. The Web Coordinator has optimized the meetings aspect of the website which has helped immensely with our unexpectedly complicated scheduling needs. The Area technology team's efforts to learn and teach the Webex software have also been a boon to the Area's ability to quickly adapt to the needs of the fellowship during the pandemic. Our needs continue to be focused around honing these skills including those that will allow hybrid meetings to take place at the group and Area level. Looking forward a bit, we need to meet with the design team to revamp the website. This is a big, multi-year process which should involve the Web Coordinator, LRPC chair, Technology team and one or more Area Officers, and is best left to be started by the new Panel.

Wendy R  
LRPC Chair
